

5-Star Accommodations Wherever The Road Takes You

(doorman not included)

Introducing The World's Most Efficient No-Idle Thermal Environment

You park, shut down your diesel engine and settle in for a great NITE's sleep because you've said goodbye forever to overnight idling.

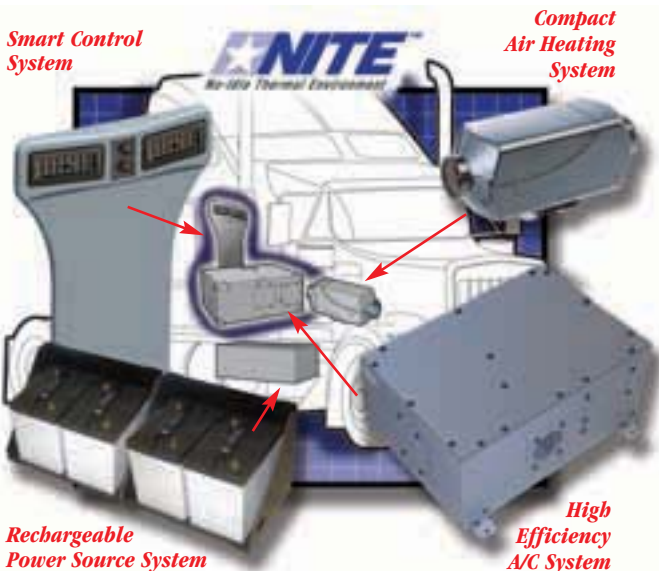

With the NITE™ (No-Idle Thermal Environment) system, you rest in 5-star comfort year-round without idling.

When it's hot, the exclusive NITE **high-efficiency A/C system** and **rechargeable power source** provides a full night of air-conditioned comfort with the truck engine turned off.

In cold weather, the NITE **heating system** keeps the sleeper compartment continuously warm no matter what the weather brings.

The NITE system fits any truck, old or new. It complies with **anti-idling regulations** and reduces air and noise pollution. Best of all, it pays for itself quickly while saving you money on fuel.

It also reduces engine wear from hours of unnecessary idling. Plus, attractive financing options are available, so you'll have plenty left over for room service.
